The following young people held an afternoon picnic at the residence of Mrs. Julia Dew, Wednesday: Mrs. A. H. Brooke, Mrs. Billson, Mrs. Campbell, Mrs. Daisy Watkins-Ferguson, Miss Brooke, Miss Grove and Miss Welty.

Family Gathering.

On Sunday, June 3rd, the Hengst family gathered at the old homestead four miles south of Logan and spent the day most pleasantly with D. E. Harsh and family, who are living there at the present time.

The day was pleasant, which added to the pleasure of being in the country, and the cordial welcome to the old home by D. E. and family was taken advantage of by a crowd of about twenty-five persons, who took possession at once, and greatly enjoyed the sumptuous dinner and supper prepared by the good aunt and sister Kate; too which all did justice. These gatherings are greatly enjoyed by all, for there is no spot to visit that recall so many things as the home of childhood.

Leasing Land.

The Central Contract and Finance Co., through their attorney, George Ewing, of Lancaster, is leasing thousands of acres of land in south Hocking and North Vinton counties for oil and gas purposes.

Mr. Ewing was in Logan this week, and says that his company believes there are large prospects there or they would not pay the heavy lease money. Old Hocking will develop yet into one of the richest counties in the state.

Children will be admitted to the Hamlet Lecture tomorrow night for 25c admission.

Nelsonville Traction Co.

Messrs. J. P. Reynolds and C. W. Juniper, of Nelsonville, representing the Nelsonville, Athens and Gloucester Traction Co., were in Logan, Saturday, seeking to secure a franchise of the county commissioners for a line to pass through this county into Murray City thence to Gloucester. The commissioners took the propositions under advisement.

Mr. Juniper and Mr. Reynolds called on the Mayor, and state that they are also interested in extending their Nelsonville line to Logan and Lancaster, and would probably be before the Council of the village in a short time to lay plans for a route through Logan, and to secure a franchise. These gentlemen are enthusiastic for their company and propose to make a network of traction lines through this valley.

Played False.

(Murray City News.)

We are just informed by good authority, that the compromise between the Square Dealers and Bosses of Hocking County, has gone up the spout.

White played false and McKay, Keynes and others representing the Square Dealers, flung the traitor as they would fling a snake. Back to your ranks boys and make ready for battle. The News said in the start, the scheme wouldn't work and The News is generally right.

Be it known, declared, proclaimed throughout the length and breadth of the county of Hocking, state of Ohio, U. S. of A. that factional troubles in said county are worse than ever and that there will be another central committee election of the county, for the county, in August, next.

Let the Ward township organization stand pat, we have the club and must use it as we alone can. Down with the traitors and up with the principles of the Grand Old Party.

Fred Nail Admitted.

We are indeed pleased to learn of the success of Fred A. Nail in passing the Supreme Court Examination and being admitted to the practice of law in Ohio. Fred is a Logan boy. A graduate of our schools and a most exemplary young man. We bespeak for him a successful career in the practice of law, and congratulate him upon his successful grappling with the big point in their shower of hard interrogatives.

Valuable Property for Sale

Having purchased the Dye farm of 130 in the town of Logan, and desiring to keep only about 20 acres same, will sell 110 acres including some bottom land and all of hill and ridge part. Will sell as a whole or divide. Soil is productive and farm is in first class repair. Would include at a low price all of the building now on front part of farm, so that purchasers could afford to move same. If sold soon would include growing crops.

See S. A. Collison, on farm, or write me at Buckhannon, W. Va. June 14, 4t. J. E. R. SINE.

Visiting Committee.

Common Pleas Judges have been notified that they have been relieved of the duty of appointing members of the county visiting board and that the power has been given to the probate judge by the legislature. The duties of the boards are to visit the different penal institutions of the county and also to investigate any sickness or trouble which might arise in families where children are interested.

Extending Yards.

Work has begun on the extending of the Hocking Valley Railroad yards at Logan. The proposed extension will give the Company the much long needed track room.

Many Thanks.

Mr. Charles Fraizer, of Washington Twp., wishes to heartily thank his neighbors for their assisting him in the purchase of a new horse, when he was sorely embarrassed in the loss of a good animal, and sickness in family.

Treatment for Rabies.

Many persons have asked the nature of the treatment for rabies as given at the various Pasteur Institutes over the country. As seven persons from Athens and vicinity are at present at Ann Arbor taking this treatment, a brief description of its nature may be of interest.

Gibier is authority for the following statement:

"Valuable results in the treatment of rabies have been yielded by the method of Louis Pasteur, who has discovered that a large quantity of virus introduced into the cellular tissue in repeated injections of progressively increasing strength, beginning as soon as possible after the bite, produces immunity. This method of prevention he applied for the first time in July, 1885. The virus for inoculation is prepared as follows: A rabbit that has been inoculated with hydrophobia is taken immediately after death, and its spinal cord is extracted and placed in a vial, where it is protected against dust, and desiccated. The first injections are made with an emulsion of this cord after it has been desiccating for 14 days, and injections of increasing virulence are given progressively. The last injections must be made with a most virulent preparation, twice as active as virus from the ordinary 'mad dog,' to obtain which is necessary first to inoculate with the virus of a dog a rabbit which dies in about 18 days. From the latter another rabbit is inoculated, and so on, until about 50 rabbits have been inoculated. The virus has then become fixed, that is the invasion takes place in the animal after about six days, and death

occurs ten or eleven days after the injection. The inoculation in man is done with a hypodermic syringe, in the sides between the iliac crest and the ribs. Statistics of the anti-rabic treatment prove beyond a doubt that the death rate from hydrophobia is greatly reduced. Indeed it may be truly said that in no case of dangerous disease, treated either by medicine or surgery, is a cure so probable."

Pasteur is inclined to the belief that the protection which he secures against hydrophobia is due to the action of a chemical substance, or a ptomaine and not to a living germ.
